

## Yards sticks for X3

Class Name	Tentative Yardstick
X3 RESORT	164.0
X3 ED	161.0
X3 FUN	147.0

In addition the following advisory factors for the base changes in the rig are advised. This list is not comprehensive.

Rig Change	Yardstick Change
+ Jib	- 3.0%
+ Gennaker	- 9.0%
+ Jib and Gennaker	- 12.5%

The changed yardsticks should be calculated as follows:

$$\text{Tentative Yardstick} - \frac{(\text{Tentative Yardstick} * \text{Yardstick Change})}{100}$$

The result should then be rounded **DOWN** to the nearest 0.5. In the case to the X3 Resort with a Jib this would give a yardstick of 159.0
